

A PLACE FOR TOMORROW. A PLACE 2-WORK.

COVID-19 RESPONSE

Community, connection and putting the individual first are not our only priorities at 2-Work. As businesses and individuals move back into the workplace and adapt to the 'new normal', the safety of members and employees in our work environments has never been more important. That's why, through the implementation of comprehensive COVID-19 protocols, we are ensuring that your working environment is as safe as possible.

Your health and safety is our priority

From environments that are frequently cleaned with decontamination sprayers to social-distancing friendly shared spaces, we have taken all the necessary steps to adapt our working environments to meet the challenges of our times.

Latest cleaning technology

Our working environments are cleaned with Steramist® decontamination sprayers: the most effective treatment available for the elimination of bacteria and viruses such as COVID-19.

Fresh air vents situated through, don't utilise recycled air, thus meaning more hygienic and better for the environment & well-being

Increased personal sanitation

Hand sanitising stations will be fitted throughout all our work environments.

Increased public sanitation

Improved cleaning standards and capacity protocols will be reinforced with strategically-placed signage.

Behavioural signage + social-distancing friendly shared spaces

Carefully considered space planning has been implemented so individuals can easily practice social distancing in 2-Work work environments.
